## DETAILS OF PLAN OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

12-1/23 lapweld 50# casing will be set and cemented with 175 sacks of cement at approximately 500 feet on January 28, 1934. This casing is to serve as a surface string in a rotary drilled well and is expected to adequately protect all shallow water bearing horizons. Tests of pipe and shut-off will be made 96 hours after completion of cement job, by the pressure method.

ApprovedJanuary 31, 1934	Company
