October 27, 1929

Following is a notice of intention to do work on land under permit described as follows:
report of work done lease

New Mexico Las Rhodes Area
(State or Territory) (County or Subdivision) (Field)
Well No. One SW 1/4 9 26 S 37E N70W
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

The well is located 990 ft. N of N line and 1650 ft. E of W line of sec. SW 1/4 Sec. 9
S W

The elevation of the derrick floor above sea level is 2961 ft.

DETAILS OF PLAN OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

The following repair work has been completed. The hole was plugged from the bottom (5473') back to 3200 using 90 sacks of oilmax cement, introduced through drill stem using Halliburton Equipment. A male and female wood plug was set at 3030'. A string of 6-5/8" O.D. 26# casing was set and cemented at 3020, using 75 sacks of cement, Halliburton method. The cement was allowed to set 10 days. The plugs were then drilled out and hole unloaded which bridged at bottom of 6-5/8" casing. It was necessary to again kill the well. The bridge was drilled out and the hole washed to 3200 at which place the cement was encountered and found to be firmly set. The hole was unloaded and blew open for four hours. The gas volume gauged 65,641,200 cubic feet, rock pressure 1400#. The well was turned into the El Paso Gas Utilities gas line October 29, 1929.
