(State or Territory)

The elevation of the derrick floor above sea level is 2985 ft.**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On the notice of intention to drill this well we indicated that we would set & cement 7"OD, 24# casing at 2860' with 125 sacks. Due to the fact that this well is logging considerably higher than anticipated, we desire approval to set and cement the 7" casing at approximately 2770' with 125 sacks of cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
