Indian Agency.....

(SUBMIT IN TRIPLICATE)

U. S. Land Office. Las CrucesLease or permit No. 030176 (a)C. C. Cagle lease

Allottee.....

UNITED STATES
DEPARTMENT OF THE INTERIOR
GEOLOGICAL SURVEY

Lease No.....

DUPLICATE

SUNDRY NOTICES AND REPORTS ON WELLS

NOTICE OF INTENTION TO DRILL.....	SUBSEQUENT REPORT OF WATER SHUT-OFF.....	X
NOTICE OF INTENTION TO CHANGE PLANS.....	SUBSEQUENT REPORT OF SHOOTING OR ACIDIZING.....	
NOTICE OF INTENTION TO TEST WATER SHUT-OFF.....	SUBSEQUENT REPORT OF ALTERING CASING.....	
NOTICE OF INTENTION TO RE-DRILL OR REPAIR WELL.....	SUBSEQUENT REPORT OF REDRILLING OR REPAIR.....	
NOTICE OF INTENTION TO SHOOT OR ACIDIZE.....	SUBSEQUENT REPORT OF ABANDONMENT.....	
NOTICE OF INTENTION TO PULL OR ALTER CASING.....	SUPPLEMENTARY WELL HISTORY.....	
NOTICE OF INTENTION TO ABANDON WELL.....		

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Wink, Texas, June 24, 1938

C. C. Cagle (a)
Well No. 2 is located 990 ft. from N line and 990 ft. from E line of XX

NW 1 Sec. 9 26 S 34 E N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Rhoades Lea County New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the ~~surface~~ ^{ground} above sea level is 2980 ft., estimated.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Total depth - 130' Red Beds.

Set and cemented 108' (5 Jts.) of 13" O.D., 40#, lapweld casing at 126' with 100 sacks of El Tere cement. Completed cementing at 1:20 PM. 6-21-38.

Drilled plug at 1:00 PM. 6-23-38. Bailed hole dry. Let stand 1 hour, tested OK.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company The Texas Company

Title District Superintendent

STADLER,

VIEW OF DESIGN OF A SECTION THROUGH

The design of a section through a structure is a complex task requiring a thorough understanding of the structural behavior and the materials used. The design process involves the selection of appropriate materials, the determination of the required cross-sectional area, and the calculation of the required reinforcement. The design must also take into account the effects of environmental factors, such as temperature and humidity, on the structural behavior. The design of a section through a structure is a complex task requiring a thorough understanding of the structural behavior and the materials used. The design process involves the selection of appropriate materials, the determination of the required cross-sectional area, and the calculation of the required reinforcement. The design must also take into account the effects of environmental factors, such as temperature and humidity, on the structural behavior.
