Lea

(Field)

(County or Subdivision)

(State or Territory)

The elevation of the derrick floor above sea level is 3013 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

To treat well with 1000 gallons Dowell mud acid through perforation from 11890-11928' in an effort to make well flow. 5-1/2" casing was set in this well at 11963'. 5-1/2" casing was perforated with gun perforator from 11890-11928.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
