Midland, Texas, August 1, 1945

Well No. 2 is located 1980 ft. from [N] line and 1980 ft. from [E] line of sec. 13  
Center of SW/4 of NE/4  
of Sec. 13 26-S 37-E  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Dublin-Ellenburger Lea New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3015 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was drilled to depth of 9861' at which point geological information indicated that further drilling was not desirable. Our method of abandonment of this well will be as follows: Cement plug will be placed from 9861-9650'; heavy mud from 9650-7000'; cement plug from 7000-6500'; heavy mud from 6500-5600'; cement plug from 5600-5100'; heavy mud from 5100-4200'. 200' cement will be placed in bottom of 9-5/8" casing at 4000'. 50' cement plug will be placed in top of hole and suitable marker will be placed in accordance with plugging requirements.

No attempt will be made to recover 9-5/8" casing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
