The elevation of the derrick floor above sea level is 2,910 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On September 16, 1950, well was shot with 300 quarts of DuPont 11-431 from 3423-3433'; well cleaned itself to plugged back depth of 3756' with no increase in oil and small increase in gas.

Tested 6 hours with bailer and no water entered hole.

Will run 3320' of 2" upset tubing and complete as a gas well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Leonard Oil Company
