(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft. (will be furnished later)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill a well for gas (or oil) to an approximate depth of 3100 feet with rotary tools. Proposed casing and cementing program is as follows:

8 5/8"-600 feet (or in Red Bed)- cement to be circulated to surface
5 1/2"-3100 feet (or Total depth)- cement with 300 sacks cement on bottom, 150 sacks above two stage tool.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
