13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Well was TA'd in 12/86 w/ CIBP set at 2800'.

Casing was pressure tested to 530# in 7/90 & held OK.

Request TA status for well.

The well is high on structure on the EAVES A LEASE, but will require deepening to produce out of the SEVEN RIVERS REEF.

This well can be a future producer & will be re-entered after evaluating the economics off the offset wells which have been re-entered and are economic producers with submersible pumps.
