INDEX FILE DE OCC
1960 APR 5 AM 10 12
We have also forwarded, on February 26, 1960, two copies of the Application for Dual Completion to the NMOCC office in Hobbs, New Mexico, with one copy each by registered mail to all offset operators listed under Item 5 of the Application for Dual Completion.

The two copies of the Application for Dual Completion were returned to us by your office with a copy of Memo No. 18-59 which states in part that "application for administrative approval of dual completions which do not utilize parallel strings of tubing or siphon strings should be accompanied by evidence that liquids do not constitute a threat to the efficient flow or testing of the well."

We would like to call your attention to the fact that the dual completion will utilize only one string of tubing. We propose to use only one string because we believe that no liquid problem will exist. In accordance with your Memo No. 18-59 we offer the following information.

The well has not yet been opened for tests in the Yates formation, consequently we cannot obtain any of the tests which are listed as normally acceptable in the last paragraph of your Memo No. 18-59 for presentation with this application. However, we have investigated further and since we do not have any Jalmat gas wells in the area, we have contacted offset operators of gas wells for this information. None of these operators have run tests specifically for liquids. Therefore no data is available

1. The first part of the document is a letter from the President of the United States to the President of the Republic of China, dated January 1, 1955. The letter is signed by Dwight D. Eisenhower and is addressed to Chiang Kai-shek. The letter discusses the relationship between the United States and the Republic of China, and the role of the United States in the Far East. The letter is a copy of the original, and is dated January 1, 1955.

and that she is now living in New York City.

I am very sorry to hear that you are having trouble with your health. I hope you will get better soon.

With love,
Your mother
