Commission Order Number R-3787 authorized us to convert this well to a salt water disposal well. After converting this well it was found that the well would not take as much water as needed. Therefore, it is proposed to deepen this well by the following procedures:

Drill out CIBP at 3251' and deepen well to a new TD of 3905'. Re-run 3" O.D. tubing and set packer at 3195'. Place well on test.
