Gentlemen:

A review of the records for your Moberly B 4 21-26-37
Lease Well No. S.T.R.
in the Rhodes Pool, which has a Gas Oil Ratio in excess
of 100,000-1, indicates that this well should remain in the Rhodes
Oil pool. The Gas Oil Ratio limit in this Pool is 10,000, which
means that gas production cannot exceed top allowable for the pool multiplied
by the Gas Oil Ratio limit for the pool.

* Our records reflect that the above well would also be classified as a
Jalmat Gas Well.

Yours very truly,

OIL CONSERVATION COMMISSION

L. G. Stanley
