The elevation of the derrick floor above sea level is 2987 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Total Depth, 3287' - Lime. 5-1/2" casing cemented at 3100' with 300 sacks.

After swabbing down well swabbed at rate of approximately 1 barrel oil per hour. We, therefore, desire permission to shoot this well with 80 qts liquid nitroglycerine from 3215 to 3255', using approximately 2 yards gravel tamp and 32' gravel cushion.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
