(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **2991** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

**T. D. 3280' - Lime.**

This well was shot on 2-10-40 with 320 quarts nitroglycerine from 3119-3280'. The shot was tamped with approximately 3 yards pea gravel and the hole loaded with oil.

After cleaning out to bottom, 2" tubing was run to 3232', and a 6 hour production test made. The well flowed an average of 42.2 barrels pipe line oil per hour with gas oil ratio 1341 during this test. Prior to shooting this well flowed 22 barrels pipe line oil in 24 hours through 2" tubing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
