The elevation of the derrick floor above sea level is 2966 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Leaves B-30 No. 2 is presently producing approximately 3 barrels of oil and 65 barrels of water per day, pumping through casing perforations from 3200 to 3210'.

In an attempt to increase oil production and shut off water it is proposed to set a bridging plug at approximately 3194' and acidize and test the following perforated intervals in order until satisfactory production is obtained:

From: 3187' to 3194'
3168' to 3182'
3149' to 3162'
3132' to 3136'
3110' to 3113'
3120' to 3126'

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

It is noted that the 1960-1961 season was the first in which the amount of water used in the city of New York was less than the amount of water available. This was due to the fact that the city had a record low of snow in the winter of 1960-1961, and the amount of water used in the city was less than the amount of water available. This was due to the fact that the city had a record low of snow in the winter of 1960-1961, and the amount of water used in the city was less than the amount of water available.

WIKI

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Arar and Collins (1971) using a Shimadzu 1601 UV-Visible Spectrophotometer. The concentration of chlorophyll was expressed in $\mu\text{g mL}^{-1}$.

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion. The number of people aged 65 and over is expected to increase from 200 million to 400 million. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion.
