OIL CONSERVATION COMMISSION
SANTA FE, NEW MEXICO

Eunice, New Mexico
(Place)

October 14, 1960
(Date)

Gentlemen:

Following is a Notice of Intention to do certain work as described below at the.....

Continental Oil Company Eaves B-30 Well No. 2 in J
(Company or Operator) (Unit)
NW 1/4 SE 1/4 of Sec 30, T. 26-S, R. 37-E, NMPM., Jalmat Pool
(40-acre Subdivision)
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

USGS approval of July 29, 1960 authorized perforating 3120-3126', 3131-3136', 3149-3155', 3168-3178' W/4 JSPF and treatment with 5,000 gals 15% LSTNE acid using 60 ball sealers. This work was performed on August 13, 1960; however it was unsuccessful inas much as no production increase was realized.

We now propose to re-acidize these perfs with 5,000 gals 15% LSTNE acid by the following procedure: Straddle the lower zone 3168-78' with a treating Pkr and retrievable BP, acidize W/2,000 gals 15% acid, unseat Pkr, pick up BP and straddle zone 3149-55', acidize through tbg. W/1,000 gals 15% acid, open circulating sleeve in Pkr. Spot 2,000 gals acid into zones 3120-26' and 3131-36'. Retrieve BP, pull tbg, Pkr and BP. Run tbg. rods and pump, recover load and place on production. Subsequent report will be filed upon completion of this work.

Approved by USGS: October 13, 1960
