The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill a well at the above location with rotary tools to a depth of 3300' in the Yates & Seven Rivers formations. Casing will be cemented in accordance with USGS regulations and other special requirements will be complied with.

The following casing program is planned: 7 5/8" OD 24# H-40 casing set at 300' w/150 sx cmt. Cement to circulate; 4 1/2" OD 9.5# J-55 production string to be set at 3300' w/175 sx cmt. Cement to return to 2500'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
