Re: Flaring of Casinghead Gas
T.F.Hodge Pubco and Wills-Federal Leases
Sections 32 and 33, T-26-S, R-37E
Lea County, New Mexico

Gentlemen:

It is anticipated that casinghead gas from the subject wells will be connected to Cabot Carbon Company's line in the near future. We have been negotiating with them for a connection to these wells, and the attached copy of a letter from their Pampa office will explain the progress to date.

As soon as this connection is completed, proper notification will be forwarded to your office.

Very truly yours,

T. F. HODGE

Dear Mr. Gideon:

Thank you for your letter of November 11th concerning a connection date for your Pubco State Well No. 3. We are connecting wells on the north end of our system now. Our field people say that they should have your well connected before November 30th, which would prevent your having to make application for an extension of time in which to vent gas from this well. As you know, we are paying you for this gas now even though we are not actually taking the gas. Therefore, we are as anxious to get your well connected as you are.

Please let me know if I can furnish any additional information.

Very truly yours,

Joseph E. Reid
