If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

After studying the future of this well, we have decided to perforate and frac the well July 25, 1996. We will perforate the 4 1/2" csg., 3178' thru 3192' and 3204' thru 3210' to open up these zones. We will frac the perms through the 2 7/8" tbg., then put the well on production.
