17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

After relocating the packer, communications developed.

Well was shut down on March 12, 1971.

We propose temporarily abandoning this well by leaving it shut in until a study of remedial possibilities can be completed to confine injection to the main pay interval of the Drinkard and Abo zones. This will eliminate injection into the Tubb zone and the upper portion of the Drinkard zone which has been contributing to water breakthrough problems.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
