No well will be essigned an allowable greater than the amount of all produced on the official test.

During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned ancreased allowables when authorized by the Division.

Will be 0.60. Gae volumes must be reported in KCY measured at a gressure base of 15,025 polo and a temperature of 60° F. Specific gravity base

Report coons pressure in lieu of tubing pressure for any well producing through cooing.

Mail original and one copy of this report to the district office of the New Maxico Oli Conservation Division in eccordance with this and appropriate pool rules.

is true and complete to the best of my knowledge and belief. I hereby certify that the above information
