During the week of July 15, 2002 work was conducted to determine the extent of casing leaks in the 5-1/2" casing. One interval was found to leak. The interval was from 5837' to 5870'. The leak bled from 625 psi to 500 psi in 15 minutes. We could not pump into leaks. We wish to plug and abandon it. Attached is the wellbore schematic with proposed plug placement.
