OTHER

OTHER Extension of T & A status ☒

17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well was previously temporarily abandoned due to severe barium sulfate scaling and subsequent high failure costs. Due to the barium sulfate scaling tendencies and the additional water volumes not being needed at this time for sales, it is requested that an extension to the T & A status be granted. Well will be placed on production when water sales demand exceed the current supply from the other existing water supply wells.
