

EL PASO NATURAL GAS COMPANY

1. Existing Roads - There is an existing compacted dirt road that comes within 300' of the proposed location. We will repair any or all that needs to be to keep road in good condition.
2. Planned access roads - Approximately 300' of new road will be required; it will be a 6" compact caliche road.
3. Location of well - All located on map and plat. The pad will be approximately 220 x 150 with all steel mud pits.
4. Lateral roads to well location - None are planned.
5. Location of tank batteries and flow line - These are to be installed after the well is completed.
6. Location and type of water supply - There will be one portable 500 barrel tank on location. Water will be hauled in.
7. Methods of handling waste disposal - The Contractor will be held legally responsible for this and it shall be removed from location.
8. Location of camps - None are planned.
9. Location of airstrips - None are planned.
10. Location of layout - See attached plat.
11. Plans for restoration of surface - Surface will be restored to USGS satisfaction.
12. We have settled with the surface owner on damages. This letter of approval will be forwarded as soon as it is received.
