Casing Program

C&K Petroleum, Inc.

Set 8-5/8" casing @ 400 feet

Mud Program

0 - 400'

Drill with fresh water, native mud. Add DMI Drilling Gel and Lime of sufficient viscosity to clean bore hole. There is possible loss in the Rustler, suggest pretreat.

400' - 3000'

Drill with fresh water and add Lime for pH control. Add DMI Gel for viscosity. Dick's Mud Seal to control seepage.

Weight 10 lbs./gal.

Viscosity 34-36 sec/1000 cc's

3000' - 5500'

Continue drilling with above fluid. Add Drispac for water loss control at 3600 feet. Recommended properties.

Weight 10.2 - 10.4 lbs./gal.

Viscosity 36 - 38 sec/1000 cc's

Filtrate 20.0 cc or less
