

## DEVELOPMENT PLAN FOR SURFACE USE

### 1. Existing roads including location etc.

The location will be serviced by State Highway 15 south of the intersection of Highway 18 and Highway 176 for 8 miles and turn east through a cattle guard. Go approximately 2 miles southeast on caliche lease road as shown on Exhibits A and B to location.

### 2. Planned access roads.

It will not be necessary to build any new access roads. This location can be reached using the old road on the Solar - Sarden No. 1 which was P & A 9-9-69.

### 3. Location of existing wells.

These are shown on Exhibits A and B.

### 4. Location of tank batteries and flow lines.

The tank battery is to be located on the drill site as shown on Exhibit E.

### 5. Location and type of water supply.

Water is to be pumped from a well owned by Mr. R. D. Sims located in NW SE Section 16 and transported through a temporary line to the drill site.

### 6. Source of construction materials.

Caliche to surface the location and road is to be taken from an existing pit in NE/4 NE/4 Section 4-23S-37E. Caliche will be purchased from the surface owner, R. D. Sims.

### 7. Method of handling waste disposal.

- A. Drill cuttings will be disposed of in the drilling pits.
- B. Drilling fluids will be allowed to evaporate in the drilling pits until pits are dry.
- C. Water produced during tests will be disposed of in the drilling pits. Oil produced during tests will be stored in test tanks until sold.
- D. Current laws and regulations pertaining to the disposal of human waste will be complied with.

### 8. Location of ancillary facilities.

None.
