13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

This well has been evaluated as an attractive Yates-Seven Rivers gas re-entry prospect, but it is also valuable if committed to injection in the waterflood planning. Since we intend to test the Glenn Ryan 10, and 11 in the Yates, and the 18 offsets the successfully re-entered 17, we will make our decision on the results of those re-entries. By May 1, 1996 we plan to either re-enter the Yates, convert to injection, or plug.
