17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Ran internally plastic coated tubing and set Guiberson Unipacker VI at 3320' and 2% KCL water treated with corrosion inhibitor and oxygen scavenger was circulated between the casing tubing annulus. Water injection commenced 3-15-80; however, we have been unable to continuously inject, due to surface equipment problems, until 4-13-80. The injection rate on 4-21-80 was 226 BWIPD at 170#. If the pressure increases, 680# will not be exceeded. An acid cleanup was not performed as approval was granted to do.

Subsurface Safety Valve: Manu. and Type _____ Set @ _____ Ft.
