

## SURFACE USE AND OPERATION PLAN

FLAG-REDFERN OIL COMPANY  
LYNN "B-25" FEDERAL WELL #5  
SECTION 25, T-23-S, R-36-E  
LEA COUNTY, NEW MEXICO

### 1. EXISTING ROADS

- A. Attached is a portion of the Rattlesnake Canyon, New Mexico U.S.G.S. topographic map showing existing roads in the vicinity of the proposed location.
- B. There are no plans for improving the existing roads.

### 2. ACCESS ROADS

- A. The proposed access road from the existing roads to the well-site is shown on the attached topographic map.
- B. The road will be constructed of caliche and will be 12' wide. This road will be 1007' long and will parallel the buried pipeline to the east and will be constructed immediately outside of the pipeline right of way.
- C. No fences, cattleguards or gates will be modified or installed.

### 3. LOCATION OF EXISTING WELLS

Existing wells are shown on the attached county map.

### 4. LOCATION OF TANK BATTERIES ETC.

- A. Flag-Redfern Oil Company does not currently own or control any surface facilities or service lines within 1 mile of the proposed location.
- B. In the event the proposed well is productive, the proposed production facility will be located on the west side of the same drilling pad where the well is located on. The production facility will consist of 3- 210 Bbl storage tanks and 1- 4' X 20' vertical emulsion treater.

### 5. LOCATION AND TYPE of WATER SUPPLY:

- A. There is a small surface pond (100' X 80') located SW  $\frac{1}{4}$ /SW  $\frac{1}{4}$  of Section 25 which is 1200' south of the proposed location. There is no other surface water within a 1 mile radius of the proposed well.
- B. There are numerous waterwells powered by windmills in the area and they all produce from the Ogallala Formation with watertables ranging from 125' to 140'.
- C. All water used in drilling operations will be trucked to the drillsite from commercial sources.
