

- B. The topsoil at the wellsite consists generally of soft sandy loam.
- C. Flora and Fauna: The vegetation cover at the proposed location is sparse, consisting of mesquite, bear grass, and miscellaneous prairie grasses and flowers. No wildlife was observed, but it is likely that typical semi-arid desert wildlife inhabit the area, which is used for cattle grazing.
- D. There are no ponds, lakes, or flowing streams or rivers in the vicinity of the wellsite.
- E. The nearest occupied dwelling is several miles east of the proposed location. The closest windmill is about two miles, south by southeast, from the location.
- F. The wellsite is on privately owned surface, with federal ownership of minerals. An agreement has been reached with the surface owner concerning surface damages and restoration of the surface, after operations have been completed.
- G. There is no evidence of any significant archeological, historical or cultural sites in the area of the proposed location. An archeological survey has been conducted by New Mexico Archaeological Services, Inc., P. O. Box 1341, Carlsbad, New Mexico, and their Archaeological Clearance Report has been submitted to all interested government agencies.

12. OPERATOR'S REPRESENTATIVE.

- A. The representative of Western Oil Producers, Inc., responsible for assuring compliance with the approved surface use and operations plan is:
