Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This is to request approval to leave above well in a TA'd status. A successful MIT was run and submitted 11/29/00. We are currently working on the Bell Lake S. 3 #19 to fish parted tubing & rods, set a CIBP above the Morrow and run an MIT. If this workover is successful, we plan to attempt to recompleat the well in the Atoka. If this Atoka recompleat is successful, we plan to propose recompleating the Bell Lake Unit #19 in the Atoka as well. The Atoka has been produced in several wells on this unit and is currently being produced in the Bell Lake S. 3 #14.
