

1. (A) Pressure control equipment to be used.

Double BOP & choke manifold.
Rotating preventer.

- (B) Pressure ratings (or API series).
3000# or 900 series

- (C) Testing procedures and frequency.

Test w/plug in wellhead
@ installation as surface casing point.

- (D) Schematic Diagram.

2. Mud Program

Type and Characteristics

Fresh water 89 - 92 35 vis no water loss in surface hole.

Salt water 9.7 - 10.2 35 vis 20cc water loss under surface.

Quantities and types of weighting material to be maintained

200 sx Barite.
