Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Our Maralo State No. 1 is presently one of two Jalmat (Gas) wells located on the 80-acre Jalmat proration unit consisting of the E/2 SW/4 Section 36, T-23-S, R-36-E. As requested by the New Mexico Oil Conservation Division and allowed under our farmout agreement with Maralo, Inc., we are today asking that Maralo, Inc. cease producing their Shell State "C" No. 2 Jalmat well located 990 FSL & 1650 FWL Section 36. Furthermore, as soon as we receive a reply from both Maralo and Getty Oil Company (operator of MLMU waterflood) as to the preference, we will promptly squeeze off the Jalmat interval in the Shell State "C" No. 2 and turn the well solely over to Getty or completely plug and abandon the Shell "C" State No. 2 thereby making our Maralo State No. 1 the sole Jalmat well on the subject proration unit.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
