

1. EXISTING ROADS:

- A. Attachment "A" is a portion of a road map showing the location of the proposed well as staked. To go to the proposed well site from Jal, New Mexico, go south on State 205 as shown. At El Paso's Plant No. 1 the paved road changes to a caliche road. Continue south-southwest past the gas plant for 4.6 miles to where the road forks. There is a sign here for "Beckham Ranch". Turn west and go 2.4 miles to near the ranch house. Continue past the ranch house for 1.7 miles to where Natural Gas Pipeline Company of America's gas pipeline crosses the road. Turn right onto the pipeline road and go north-northwest 2.9 miles. The proposed well site is about 1500 feet east-northeast of this point.
- B. Attachment "B" is a plat showing existing roads in the vicinity of the well site. Existing roads are color coded.
- C. Any repair to existing caliche roads does not appear necessary at the present time.

2. PLANNED ACCESS ROAD:

- A. Length and width: The new road will be 12 feet wide and approximately 1300 feet long. The new road is labled and color coded red on Attachment "B". The center line of the proposed new road, from the beginning to the well site, has been staked and flagged with the stakes being visible from any one to the next.

The 2.9 miles of 2-track, dirt pipeline road to be used for access to the well site will be up-graded by grading and surfacing with caliche.
- B. Surfacing Material: Six inches of caliche, watered, compacted and graded.
- C. Maximum Grade: Three percent.
- D. Turnouts: Approximately eight.
- E. Drainage Design: New road will be crowned with drainage to both sides.
- F. Culverts: None required.
- G. Cuts and Fills: None necessary. Only minor levelling will
