(NOTE: Report results of multiple completion or Well
Completion or Recompletion Report and Log form.)17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any
proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones perti-
nent to this work.)*

As per the May 4, 1984 request to the Superior Oil Company, we intend to test the casing integrity by pressuring up to 500 psi on the tubing to determine if the casing will hold the pressure for 15 minutes. We will notify a field inspector prior to performing the test. On 1/31/83, a CIBP was set @ 12,060' in the 9 5/8" casing string and capped with 35' of cement; 2 7/8" tubing was run open ended to 12,042'. The well configuration is still in the above condition. Southland Royalty Company recently acquired this well in a trade and our delay in filing this plan is due to the time required to obtain actual well records.
