This well came out on a list from Vic Lyon indicating it was listed in Stat Book but not in gas proration schedule.

Upon investigation it was found that Completion report had been filed and the MC form C-107 had been filed in the wrong well file and no allowable was ever assigned since the operator failed to file C-104 with this office. Also no gas connection notice was ever received from the gas transporter.

5/10/90 Called operator and requested they submit C-104 and a gas allowable was assigned. NSP and NSL had already been approved the well.
