16. Check Appropriate Box To Indicate Nature of Notice, Report, or Other Data

NOTICE OF INTENTION TO:

TEST WATER SHUT-OFF ☒
FRACTURE TREAT ☐
SHOOT OR ACIDIZE ☐
REPAIR WELL ☐
(Other) ☐

PULL OR ALTER CASING ☐
MULTIPLE COMPLETE ☐
ABANDON* ☐
CHANGE PLANS ☐

SUBSEQUENT REPORT OF:

WATER SHUT-OFF ☐
FRACTURE TREATMENT ☐
SHOOTING OR ACIDIZING ☐
(Other) ☐

REPAIRING WELL ☐
ALTERING CASING ☐
ABANDONMENT* ☐

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

It is proposed to determine the source of water by isolating each zone and swab testing. Based on swab test results, an appropriate course of action will be recommended. If the lowest zone is determined to be the source of water, it will be shut off with a bridge plug or cement retainer. If the middle zone proves to be the source of water, it will be squeezed off. In the event that the upper zone proves to be the source, a tracer survey will be conducted to determine if the water is channeling from above the lower paddock or coming from within the zone. If a channel appears probable, cement squeeze and reperforate, assuming the zone is oil productive. If no evidence of a channel, the decision to produce or squeeze the zone will be dependent upon the oil production rate.

RECEIVED

18. I hereby certify that the foregoing is true and correct
