CASING AREA

To supplement BLM Form 3160-3 Application to Drill the following additional information is submitted concerning questions on Page 5 of NTL-6:

1. See Form 3160-3
2. See Form 3160-3
3. The geological name of surface formation is: Ochoa
4. See Form 3160-3
5. See Form 3160-3
6. The estimated tops of important geological markers are:

Base Red Beds	400'
Rustler	1,020'
Tansil	2,500'

7. The estimated depths at which anticipated water, oil, gas, and mineral bearing strata are as follows:

Yates	2,650'- Oil
T/Serv Riv	2,890'- Oil

8. See Form 3160-3. All casing will be new.
9. See Form 3160-3 for depths of strings. Cement volumes and additions as follows:
 - A. 8 5/8" csg: Cement w/275 sx Lite "C" cmt w/15# salt. Circulated to surface.
 - B. 5 1/2" csg: Cement w/+1100 sx Cl "C" Lite. Circulate to Surface.

A caliper log will be run prior to setting 5-1/2" pipe to determine exact cement volumes required.
