Re: Non-Standard Gas Proration Unit  
B.F. Harrison "B" #12  
Unit C, Section 9, Township 23S, Range 37E  
Lea County, New Mexico

Dear Mr. Williams,

Texaco Exploration and Production, Inc. respectfully requests a non-standard 120 acre gas proration unit in the North Teague Tubb Associated pool for the B.F. Harrison "B" #12. Another Tubb well, the B.F. Harrison "B" #17, occupies a standard 40-acre proration unit in the same 160-acre subsection, as can be seen on the attached plats. Therefore, in order to be in compliance with state regulations when this well is completed, a non-standard 120-acre unit is required.

This same non-standard gas proration unit was originally set-up through Administrative Order NSP-1717 for the B.F. Harrison "B" #25, which is located 136 ft from B.F. Harrison "B" #12. B.F. Harrison "B" #25 was originally completed in the Tubb formation, but has since been plugged back and re-completed in the Blinebry. In an attempt to capture the remaining reserves, we propose to re-complete the B.F. Harrison "B" #12 in the Tubb formation and produce from this gas proration unit.

Offset Operators have been notified by copy of this application. If you have any questions concerning this request, please contact me at (915) 688-4639.

Sincerely,

A handwritten signature in black ink, appearing to read "Tim Nein".

Tim Nein  
Production Engineer
