Re: G.W. Sims No. 1
Unit Letter D, Section 9, T23S, R37E
Lea County, New Mexico

Mr. Sexton:

G.W. Sims No. 1 is currently completed in the Wildcat Drinkard.

Texaco respectfully requests a 60 day temporary allowable as follows:

Wildcat Drinkard: 4402 BO/month (142 BOPD)
49.6 MMCF/month (1600 MCFPD)

This allowable request is based upon the current production rate of 140 BOPD, 32 BLWPD, and 1,528 MCFPD, 48/64" choke, FTP 200 psi.

A 60 day test period will allow additional information to be gathered on the Drinkard. This data will include well tests, pressure buildup data, and testing of reservoir fluids. Using this data, a field development plan can be implemented to maximize ultimate recovery, production rates, and economics.

Your consideration in this matter is appreciated.

Sincerely,

K. Glenn Carter for CPB

C.P. Basham
Drilling Operations Manager
