**RE: Application for Unorthodox North Teague Tubb- Ass. Gas Well Location
and Simultaneous Dedication
F. B. Davis #1
North Teague Tubb-Associated
UL A, Sect. 8, Town. 23S, Range 37E
Lea County, New Mexico**

Dear Mr. LeMay and Mr. Sexton:

Texaco Exploration and Production Inc. respectfully requests administrative approval for an unorthodox Tubb gas well location for the F. B. Davis #1, located 660' FNL, and 500' FEL, section 8, Township 23S, and Range 37E. The F. B. Davis #1 is currently completed in the Drinkard-Abo formation and has reached it's economic limit. TEPI intends to recomplete the subject well uphole to the Tubb gas pool. TEPI also requests simultaneous dedication of the Tubb gas production from the F. B. Davis #1 with the production from F. B. Davis #5. The F. B. Davis #5 is a Tubb gas well that is currently dedicated to an existing 160 acre proration unit comprised of the NE corner of section 8.

Attached is NMOCD form C102 identifying the proposed situation on the subject 160 acre proration unit. Also attached is a list of offset operators and/or co-owners for this unit.

TEPI believes approval of this request will be in the interest of conservation, will protect correlative rights, and will allow for a more complete recovery of Tubb gas reserves from the subject acreage.

TEPI has notified offset operators of this application by copy of this application package sent by certified mail. If you need further information concerning this matter, please contact me at (505) 397-0426. Thank you for your consideration of this proposal.

Sincerely,

Darrell J. Carriger
Engineer Assistant
