RE: Off Lease Gas Measurement  
Sharp Well #1  
Unit F, Sec 12, T-23S, R-37E  
Cline; Tubb - Lwr Pdk/Blinebry

Samedan Oil Corporation is requesting permission for Off Lease Gas Measurement on the above mentioned well. Commingling Order PC-887 allows us to surface commingle production. However we will be running two lines to tie into Warren's Gas line located at the Branex Federal Lease location, Unit L, Sec 12, T-23S, R-37E, Lea County. A 3" SDR11 Polyethylene, 70 PSI line will carry gas produced from the Lower Paddock/Blinebry zone, and a 4" SDR11 Polyethylene, 70 PSI line will carry gas produced from the Tubb zone. Each zone will be metered separately and sold at the tie-in point.

The Tubb zone is capable of producing 550 MCFPD, and the Lower Paddock/Blinebry zone is capable of producing 712 MCFPD.

I have attached a plat showing the proposed gas line route. I am also notifying the Bureau of Land Management of our intentions.

If I can be of further help please notify.

Thank you,

  
Judy Throneberry
