Donna,

Here is another C104 naming Sid Richardson as the gas gatherer. The field talked to Jerry Sexton and he wanted them to go ahead and hook the gas line instead of continual venting. The line was hooked up at 1pm on Saturday November 4, 1995. We are still testing the well trying to get the GOR straightened out but with this C104, this should allow us to continue moving/saling production. Call me if you have any questions, 915-688-6943. Thanks
