Re: Permanent Abandonment

Well: 16 G. E. Jordan Fed.NCT-1

CONDITIONS OF APPROVAL

1. Plugging operations authorized are subject to the attached "General Requirements for Permanent Abandonment of Wells on Federal Leases".
2. The Hobbs office (telephone (505) 393-3612) is to be notified in sufficient time for a representative to witness all plugging operations.
3. Blowout prevention equipment is required.
4. In addition to normal filling of pits and cleanup of location, additional surface restoration work may be required, i.e. ripping of pad and/or access road, reseeding, etc. We have asked the Bureau of Land Management for the surface restoration requirements for this well and we should be able to furnish you these requirements within 30 days. After plugging the well and before making final clean-up, you should contact this office unless you have already been advised as to what additional surface restoration work is required.
5. At step 4, minimum cement plug across casing stub should be 35 sacks.
6. Additional 35 sack plug is to be set in interval between 750-850 feet. Plug is to be tagged to make sure plug is in place.
7. If 4½" casing is not cut and pulled from below 1200 feet contact USGS for approval of change in plugging procedure.
