Plugs were set as follows to abandon the above well for oil and gas purposes:

Hole loaded with 100 SAX heavy mud.

The upper portion of the above well has been converted to a water well by the grazing permittee by running 7" casing into the hole and gravel packing same. The casing was run to the shallow water sands near 18'. The hole below this casing is packed with sand.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
