The elevation of the derrick floor above sea level is 3477 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

At 70 5080', we plan to set cement plugs from 5080-4910, from 4750-4700, from 1150-1100, from 465-365, and a 15 sack plug at surface, using mud between all plugs, and use a 4 foot location and identification marker. 414' of 24# 8-5/8" casing with 150 sex cement circulated will be left in hole.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
