NOTICE OF INTENTION TO ABANDON WELL		

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Loco Hills, New Mexico, March 21, 19 52

Well No. 1 is located 660 ft. from N line and 660 ft. from E line of sec. 26  
SE SECTION 26 25-S 35-E NMPM  
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Wildcat Lea New Mexico  
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3114 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On March 15, 1952, we landed 5068' of new 9-5/8" OD 36# & 40# J-55 Youngstown seamless casing at 5082' and cemented with 210 sacks cement preceded with heavy mud to surface.  
 After standing cemented 8 hours a Halliburton Temperature Survey was run which showed top of cement behind casing (in 12 1/2" hole) to be at approximately 4230'.  
 After Standing cemented 73 hours plug was drilled and water shut-off tested by the pressure method (1000# pressure for 30 minutes).  
 Halliburton Oil Well Cementing Company equipment was used in cementing operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company GENERAL AMERICAN OIL COMPANY OF TEXAS
