Wells A-1 Well No. <u>1</u> is located	660 ft. from	$\begin{bmatrix} \mathbf{N} \\ \mathbf{S} \end{bmatrix} \text{ line and } \underbrace{330}_{\text{ft. from }} \text{ft. from } \begin{bmatrix} \mathbf{I} \\ \mathbf{W} \end{bmatrix} \text{ line of sec. } \underbrace{\mathbf{I}}_{\text{ft. from }} \end{bmatrix}$		
Well No 1 is located .		$\begin{bmatrix} \mathbf{N} \\ \mathbf{S} \end{bmatrix} \text{ line and } \underbrace{330}_{\text{ ft. from }} \text{ ft. from } \begin{bmatrix} \mathbf{M} \\ \mathbf{W} \end{bmatrix} \text{ line of sec. } 1$		
Well No is located	25-5 36-E (Twp.) (R	•		

The elevation of the derrick floor above sea level is 3226 ff B

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Previous work on this well was performed under authorization to plug back and recomplete. In October 1960, we set a PKR at 2972' and acidized 3012-48' %/1000 gals 15% LSTNE acid. Work done was unsuccesful.

We now propose to drill out retainer at 3064' and clean out to 3150', perforate Seven Rivers from 3124-36' %/2 shots/ft, run treating PER set above 3124' and below 3085', acidize %/3000 gals of 15% LSTME acid, swab load and test.

	l understar	d that this plan of work must receive approval in writin	ng by the Geological Survey before operatio	ns may be commenced.
