(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

March 3, 1959

Ohio Federal Byers
 Well No. 1-6 is located 660 ft. from XXX [S] line and 1991.9 ft. from XXX [W] line of sec. 6
SE/4SW/4 Section 6 25S 36E N.M.P.M.
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Undesignated Lea New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3243 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 3700' Tansill dolomite test, using combination tools.

I propose to rotate to approximately 1720' and cement 8 5/8" casing there in anhydrite, using 100 sacks neat with gel added.

We will drill ahead from there with cable tools. A 5 1/2" oil string will be cemented through the Tansill dolomite pay with 100 sacks, at approximately 3625'.

All casing will be run and cemented under methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
