November 21, 19 58

Pan Am Federal Kelly  
Well No. 1-7 is located 660 ft. from N line and 1989.8 ft. from E line of sec. 7  
NE 1/4 Section 7 25S 36E N.M.P.M.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Undesignated Lea New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3217 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 5,100' test well, using combination tools. We plan to rotate to approximately 1,500' and cable tool from there to T. D.

I plan to cement 8 5/8" surface pipe in anhydrite around 1,500', with 100 sacks.

Should Capitan dolomite production be developed deeper, a 5 1/2" oil string will be run.

All casing will be run and cemented, using methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
